Dear Ms. Kristoff:

Nadic Engineering Services, Inc. (NES) is pleased to provide this Contamination Screening Evaluation Report (CSER) of the facilities on the selected route for the above referenced project. The purpose of this report is to identify the known and potentially contaminated sites along the selected project corridor.

NES appreciates the opportunity to work with you, RS&H and FDOT on this project and look forward to a continued association. Please contact us if you have any questions or concerns about the report, or if we may be of further assistance.

Sincerely,
NADIC ENGINEERING SERVICES, INC.

Jason M. Neal, E.I.

Contamination Screening Questionnaire

1.0 INTRODUCTION

This Contamination Screening Evaluation Report (CSER) has been prepared in accordance with the Florida Department of Transportation's (FDOT) Project Development and Environment (PD&E) Manual, Chapter 22, Contamination Impacts, dated January 17, 2008. The purpose of this report is to present the findings of a contamination screening evaluation conducted for the proposed I-95 Interchange at Ellis Road and roadway improvements along Ellis Road from South John Rodes Boulevard to South Wickham Road in Melbourne and West Melbourne, Brevard County. The process of screening the project study area for potential contamination is undertaken to avoid costly construction delays as a result of encountering unexpected soil or groundwater contamination. Identification of potential problem areas early in the project development process allows FDOT to make informed decisions regarding avoidance or management of impacts.

This report identifies and evaluates areas of known or potential contamination in the project study area. It includes descriptions of the project, the area's hydrogeologic features, land use and sites with potential concern. Recommendations are made concerning known and potentially contaminated sites as they relate to the proposed project.

2.0 PROJECT DESCRIPTION

The FDOT is planning a new interchange at I-95 and Ellis Road...analysis of additional capacity on Ellis Road from I-95 to Nasa Boulevard in Melbourne.

The FDOT is planning a new interchange at I-95 and Ellis Road at Mile Post (MP) 22.07 and an analysis of additional capacity on Ellis Road from I-95 to Nasa Boulevard in Melbourne and West Melbourne. The project site is located in Sections 25 through 27 and 34 through 36, Township 27 South, Range 36 East and Sections 30 and 31, Township 27 South, Range 37 East in Brevard County, Florida.

A Project Location Map is shown on **Figure 1** in **Appendix A**.

3.0 LAND USE

To determine the potential impacts to the project, existing land use within the Ellis Road corridor was reviewed. The existing land use was determined from the interpretation of land use maps from the Cities of Melbourne and West Melbourne and Google Aerial Photography (2010), 1"=200' aerial maps, all supplemented by field reconnaissance of the project corridor. Land Use Maps for the Cities of Melbourne and West Melbourne are presented on **Figures 2A** and **2B** in **Appendix A**, respectively. An Aerial Map of the project vicinity is presented on **Figure 3** in **Appendix A**.

May 9, 2011

West of the proposed interchange at I-95/Ellis Road are wetlands, vacant land and wooded areas with a few unpaved access roads. East of I-95/Ellis Road Interchange to South John Rodes Boulevard is a drainage canal and construction borrow pit. There is a residential neighborhood adjacent to I-95 and just north of the proposed interchange. The south side of Ellis Road from South John Rodes Boulevard to South Wickham Road is industrially and commercially developed with few vacant lots remaining. The majority of the north side of Ellis Road between the same limits is industrially and commercially developed with 19 residential lots lying west of Lake Ibis Drive.

Businesses along Ellis Road consist of commercial offices, warehouses, service centers, retail stores and automobile repair facilities. A review of real estate records from the Brevard County Property Appraiser's Office found that Ellis Road has been historically used for industrial/commercial business.

4.0 HYDROGEOLOGICAL FEATURES

4.1 United States Geological Survey (USGS) Quadrangle Map

The "Melbourne West, Florida" USGS topographic map issued in 1949, photo revised in 1988, in the vicinity of the subject alignment was reviewed. The alignment is shown on an excerpt of the USGS topographic map and presented on **Figure 4** in **Appendix A**. The map shows the ground surface elevation in the project vicinity to range from approximately +19 to +24 feet, North American Vertical Datum of 1988 (NAVD-88).

4.2 Soils

The "Soil Survey of Brevard County, Florida" published by the United States Department of Agriculture (USDA), Soil Conservation Service (SCS) was reviewed. The USDA soil survey indicates 11 primary mapping soil units are identified within the project vicinity and are presented on the following page in **Table 1**. Refer to **Figure 5** in **Appendix A** for a reproduction of the SCS map for the project area.

Table 1: Soil Survey Summary

Soil Series	Depth (Inches)	Soil Description	AASHTO Classification	USDA SHGWT* (inches)	Risk of Corrosion	
					Uncoated Steel	Concrete
Basinger (Ba)	0-80	Sand	A-3	0-10	High	Moderate
Copeland (Cp)	0-15	Loamy fine sand	A-3	0-10	High	Low
	15-22	Sandy clay loam, sandy loam	A-2			
	22-30	Marl	--			
Chobee (Ch)	0-14	Sandy loam	A-2	0-10	Moderate	Low
	14-38	Sandy clay loam, sandy loam	A-2, A-6			
	38-63	Sandy clay loam, sandy loam, loamy sand	A-2, A-6			
Eau Gallie (Eg)	0-22	Sand	A-3	0-10	High	High
	22-35	Sand	A-2, A-3			Moderate
	35-55	Sand	A-3			Moderate
	55-61	Sandy clay loam, sandy loam, fine sandy loam	A-2			Low
	61-84	Loamy sand, sandy loam, loamy fine sand, fine sandy loam,	A-2			Low
Felda (Fa)	0-30	Sand	A-3	0-10	High	Low
	30-49	Sandy loam, sandy clay loam	A-2			
	49-62	Sandy loam, loamy sand, sand	A-2			
Chobee part of Fo	0-14	Sandy loam	A-2	0-10	Moderate	Low
	14-38	Sandy clay loam, sandy loam	A-2, A-6			
	38-63	Sandy clay loam, sandy loam, loamy sand	A-2, A-6			
Felda part of Fo	0-30	Sand	A-3	0-10	High	Low
	30-49	Sandy loam, sandy clay loam	A-2			
	49-62	Sandy loam, loamy sand, sand	A-2			
Malabar (Ma)	0-45	Sand	A-3	0-10	High	Low
	45-61	Sandy loam, sandy clay loam	A-2, A-6			
	61-65	Sand	A-3, A-2			
Myakka (Mk)	0-22	Sand	A-3	0-10	High	High
	22-35	Sand	A-2, A-3			
	35-46	Sand	A-2, A-3			
	46-63	Sand	A-3			

Table 1: Soil Survey Summary (Continued)

Soil Series	Depth (Inches)	Soil Description	AASHTO Classification	USDA SHGWT* (inches)	Risk of Corrosion	
					Uncoated Steel	Concrete
Quartzipsammets, smoothed (Qr)	--	--	--	--	--	--
Tomoka (Tw)	0-27	Muck	A-8	0-10	High	Low
	27-35	Sand	A-3		Low	Low
	35-55	Sandy clay loam, sandy loam	A-2		Moderate	Low
Valkaria (Va)	0-15	Sand	A-3	0-10	High	Low
	15-80	Sand	A-3			
Winder (Wn)	0-12	Loamy sand	A-2	0-10	High	Low
	12-17	Sandy loam	A-2			
	17-31	Sandy clay loam	A-2, A-6			
	31-47	Sandy clay loam, sandy loam	A-2			
	47-65	Sandy clay loam, sandy loam	A-2			

Information from the USDA Soil Survey is very general and may be outdated due to recent developments in the project site vicinity. Therefore, it may not reflect the actual soil and groundwater conditions, particularly where development has modified the natural soil conditions or surface and near surface drainage.

4.3 Surface Water

Based on topographic contours of the United State Geological Survey (USGS) map titled "Melbourne West, Florida," general surface water direction for the project vicinity is anticipated to be south, towards Crane Creek and east, towards the Indian River. Surface water flow adjacent to I-95 is anticipated to flow west towards the St. Johns River.

4.4 Hydrogeology

The geology of Brevard County is characterized by sedimentary strata. Groundwater in Brevard County occurs under artesian and non-artesian conditions. Non-artesian water (surface aquifer) occurs in the sediments of Pleistocene and Recent Age, whereas artesian water (Floridan Aquifer) is in the underlying limestone formations of Eocene Age.

The county is underlain by a series of limestone formations having a total thickness of several thousand feet. The upper several hundred feet of the limestone formations constitute the Floridan aquifer, which generally includes the Avon Park Limestone and the overlying Ocala Group of limestone formations, all of the Eocene age. The Floridan aquifer is one of the most productive aquifers in the world. The extremely high productivity of this aquifer is directly related to its numerous cavities and interconnected channels. The top of the artesian aquifer is

approximately 75 feet below sea level in the northwestern corner of the county and more than 300 feet below sea level in the southeastern corner. In Brevard County, the direction of movement of the artesian water is generally northeastward, except under the barrier islands.

Overlying the artesian aquifer are beds of sandy clay, shells and clay of the Hawthorn Formation of Early and Middle Miocene Age and deposits of Late Miocene or Pliocene Age. These beds serve to confine water under pressure in the underlying artesian aquifer. The confining beds are overlain by unconsolidated deposits of sand and sandy coquina of Pleistocene and Recent Age which completely cover all of Brevard County. The sediments of Pleistocene and Recent Age average approximately 50 feet in thickness in the coastal ridge area but are less than 20 feet thick in the vicinity of the St. Johns River. Non-artesian water saturates approximately 40 feet of these sediments in the coastal ridge area and the zone of saturation thins toward the St. Johns and Indian Rivers.

5.0 METHODOLOGY

5.1 Data Review

A preliminary environmental screening assessment of the Ellis Road corridor extending from the proposed interchange at I-95 to South Wickham Road was conducted to identify potential contamination concerns from past or present facilities and property areas situated within or near the proposed project limits. A total of 55 sites were identified and evaluated within the project limits for a possible impact on proposed interchange construction and roadway improvements. These sites are presented on **Figure 6** and **Table 2** in **Appendix B**. The environmental screening assessment consisted of the following tasks.

5.1.1 Corridor Reconnaissance

NES performed a site visit on April 14, 2011 to identify the facilities along the proposed corridor and to identify sites, operations or areas with indications of past or present regulated storage, use or applications. Potential sites were visually examined to the extent of available access for evidence of contaminant release or operations known to be associated with regulated material use or hazardous waste generation. The properties were visually inspected for evidence of contamination such as stressed vegetation, vent and fill pipes, accumulated areas of debris, evidence of buried materials, stained areas, etc.

Photographs of some of the sites are presented on the **Photographic Log** in **Appendix C**. Typical samples of site review information forms and contamination screening questionnaires are provided in **Appendix F**.

5.1.2 Interviews

On site personnel were also interviewed when available. An NES representative interviewed occupants of the related properties. In addition, NES provided questionnaires to the facility representatives to complete.

5.1.3 Regulatory Agency Record Review

As part of this assessment, NES reviewed information sources to obtain existing information pertaining to release or disposal of hazardous materials on or near the subject corridor. NES utilized the services of FirstSearch™ Technology Corporation, which maintains a computer database of the National Priority List (NPL), the Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS), Resource Conservation and Recovery Act (RCRA) notifiers, Emergency Response Notification System (ERNS), Leaking Underground Storage Tanks (LUST) sites, Underground Storage Tanks (UST) sites, State Priority Sites from the Florida Department of Environmental Protection (FDEP) and FDEP Solid Waste Sites within the subject project corridor. The summary report from FirstSearch™ lists all sites within a 0.50 mile radius of the subject corridor.

5.1.4 Public Agency Record Review

Available historical aerial photographs of the study area from the United States Geological Survey (USGS) and the United States Department of Agriculture were reviewed to determine past facility locations along the project corridor. Photographs that were found for review dated 1943, 1950, 1958, 1969, 1979, 1994 and 2010. A summary of the historical aerial imagery review is presented on **Table 3** in **Appendix B**.

The 1943 aerial is of poor quality. It shows no signs of development within the project vicinity. Aurora Road (County Road 511) is visible in the northeastern portion of the image. This aerial is presented as **Photo 1** on the **Photographic Log** in **Appendix C**.

The 1950 aerial is of poor quality. No roads or development are apparent in the project vicinity. Melbourne Airport is visible just east of the project corridor. This aerial is presented as **Photo 2** on the **Photographic Log** in **Appendix C**.

The 1958 aerial is of fair quality. Ellis and Wickham Roads are visible in this photo. However, the roads do not appear to be paved. Emerald, Tropic, Coral, Lake Ibis and Silver Sands Drives (unpaved) are visible at the corner of Ellis and Wickham Roads. No other signs of development are apparent in the project vicinity. This aerial is presented as **Photo 3** on the **Photographic Log** in **Appendix C**.

The 1969 aerial is of fair quality. South John Rodes Boulevard and I-95 appear in this photo. More development is apparent close to the corner of Ellis and Wickham Roads and also towards the corner of Ellis Road and South John Rodes Boulevard, which do not appear to be paved. This aerial is presented as **Photo 4** on the **Photographic Log** in **Appendix C**.

May 9, 2011

The 1979 aerial is of fair quality. Roads intersecting with Ellis Road on the north side are visible. Development continues to grow in the eastern (Ellis & Wickham Roads) and the western portions (South John Rodes Boulevard & Ellis Road) of the project corridor, especially in the southeastern portion. Residential parcels are observed on the north side of Ellis Road just west of Lake Ibis Drive. Ellis Road appears to be paved in this photo. This aerial is presented as **Photo 5** of the **Photographic Log** in **Appendix C**.

The 1994 aerial is of good quality and shows development throughout the project corridor. The majority of the south side of Ellis Road is commercially developed. Stormwater ponds are visible in the vicinity of the project corridor. This aerial is presented as **Photo 6** of the **Photographic Log** in **Appendix C**.

The 2010 aerial is of good quality and shows heavy commercial development throughout the project corridor. They are very few vacant lots remaining. Stormwater ponds and construction borrow pits are visible in the vicinity of the project corridor. This aerial is presented as **Photo 7** of the **Photographic Log** in **Appendix C**.

5.1.5 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were originally created for assessing fire insurance liability in urbanized areas in the United States. The maps include detailed information regarding town and building information including building construction, business type, building contents, fuel storage tanks and other factors affecting fire risk. Sanborn Maps for the project vicinity were not available for review.

5.2 Risk Assessment of Potential Contamination Sites

A determination of the risk of encountering contamination was made for all potential contamination sites after review of all available information. These determinations are based on the following: existence of contamination at the site, direction of groundwater flows, cleanup efforts on the known contamination sites, distance of the subject property to the proposed roadway corridor, questionnaire/site review information form results where applicable and on the degree of concern to the proposed project. The risk rating identifies four degrees of risk for general reference purposes.

For each potential contamination site, **NES** assigned a Contamination Risk Potential Rating (CRPR) of:

- 1. No**
- 2. Low**
- 3. Medium**
- 4. High**

May 9, 2011

The risk ratings are defined as follows:

No: After a review of all available information there is nothing to indicate contamination would be a problem. It is possible that contaminants could have been handled on the property; however, all information (DEP reports, monitoring wells, water and soil samples, etc.) indicate that contamination problems should not be expected. Examples of operations that may receive this rating are:

A gas station that has been closed and has a closure assessment or contamination assessment documenting that there is no contamination remaining.

A wholesale or retail outlet that handles hazardous materials in sealed containers which are never opened while at this facility, such as spray cans of paint or a "drug store."

Low: The former or current operation has a hazardous waste generator identification (ID) number or deals with hazardous materials; however, based on all available information, there is no reason to believe there would be any involvement with contamination in relation to this project.

Medium: The subject roadway is located near or at the same location of a known contaminated site and there is a record shown that a cleanup effort has been done in the vicinity. Included within this risk rating are sites which present a moderate degree of concern regarding contamination but do not have sufficient indications of contaminations to be included in high risk category.

High: After a review of all available information there is a potential for contamination problems. Further assessment will be required after roadway corridor selection to determine the actual presence and/or levels of contamination and the need of remedial action. Included in this category is a facility located in the same location of known contaminated sites that has no record of a cleanup effort.

6.0 PROJECT IMPACTS

Based on our review of the FDEP databases and the FDEP Florida Site Summary lists, 55 potential contamination sites were identified adjacent to the Ellis Road corridor. The potential contamination sites include 11 (LUST/UST) facilities, 31 Resource Conservation Recovery Act Generator (RCRAGN) facilities, 1 (one) Resource Conservation Recovery Act No Longer Regulated and 12 facilities with no regulatory agency records. NES defined the corridor buffer zone to be approximately a 0.25 mile radius.

A total of 55 contamination and potential contamination sites are identified by file research and field reconnaissance along the roadway corridor. These sites and their Contamination Risk Potential Ratings (CRPR) are summarized in **Table 4** on the following page.

Table 4: Summary of Potentially Contaminated Site Risk Ratings

CRPR	No. of Facilities	
High	1	
Medium	4	
Low	38	
No	12	
	Total	55

The potential contamination site locations are shown on **Figure 6** in **Appendix B**. For details on these sites refer to **Table 2** in **Appendix B**. **Table 2** includes the following: site number, facility name, address, facility ID/EPA ID, database type, distance from proposed project corridor, storage tanks, potential contaminants, facility type, facility status, clean up efforts and CRPR. The information is based on FDEP/EPA file search, field reconnaissance and review of obtained databases.

Site 1

Sunrise Food Mart #43

450 South Wickham Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 50 feet

This site is a retail gasoline station. The FDEP Storage Tank and Petroleum Contamination Monitoring (STCM) database lists that this site is closed, has one (1) registered storage tank and there is known contamination. According to the database, there are two dates of contaminant discharge; 10/18/1985 and 03/02/1998. The cleanup efforts are ongoing and pending petroleum cleanup. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **High** CRPR. A photograph of this facility is presented as **Photo 8** of the **Photographic Log** in **Appendix C**.

Site 2

Southern Bell 33053 (Currently AT&T)

7747 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 220 feet

This site is a fuel user that is non-retail. The FDEP STCM database lists that this site is closed, has one (1) registered storage tank and there is known contaminant discharge. According to the database, the contaminant discharge occurred on 08/27/1987. As of 10/02/2010, the cleanup efforts are reported as complete. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Medium** CRPR. A photograph of this facility is presented as **Photo 9** of the **Photographic Log** in **Appendix C**.

Site 3

Rayco Enterprises Inc.

8000 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 50 feet

This site is an agricultural type facility. The FDEP STCM database lists that this site is closed, has one (1) registered storage tank and there is known contaminant discharge. According to the database, the contaminant discharge occurred on 08/23/1991 and as a result the soil at the site was contaminated. As of 09/21/2008, the cleanup efforts are reported as complete and there is no current known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Medium** CRPR.

Site 4

Sam Discount Beverage

370 South Wickham Road, Melbourne, FL 32904, Approximate distance from right-of-way: 550 feet

This site is a retail gasoline station. The FDEP STCM database lists that this site is open, has one (1) registered storage tank and there is known contamination. According to the database, the contaminant discharge occurred on 04/22/1988 and as a result there was groundwater and monitoring well contamination. As of 02/03/2002, the cleanup efforts are reported as complete and there is no current known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Medium** CRPR.

Site 5

Auto Salvage Unlimited

7629 Coral Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 470 feet

This site is an automobile parts salvage yard. The FDEP Resource Conservation Recovery Act Generator (RCRAGN) database lists that this site is a conditionally exempt small quantity generator-Non notifier (CES) of hazardous waste as of 12/12/2001. On 10/05/2000 the FDEP Division of Law Enforcement, Bureau of Emergency Response filed an Initial Report of Emergency Response Incident. It was reported that there was a vehicular fuel tank leak of approximately 20 gallons of petroleum that contaminated the soil. The fuel leak caught fire and was extinguished by the Fire Department within 15 minutes of the initial call.

There is record of five (5) violations for this facility. During a Legacy Site Inspection conducted on 12/12/2001, FDEP detected release of used oil into the environment, and found improper condition of containers, labeling of them and above ground tanks used store oil. Further study indicated that oil based contaminants were present and exceeded the FDEP's Soil Cleanup Target Levels (SCTLs) for leachability. In 2004, the contaminated soils were excavated and a Source Removal Report was provided to FDEP on 10/13/2004 indicating the groundwater contaminant levels were below the FDEP levels.

May 9, 2011

Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Medium** CRPR.

Site 6

Highway Hi-Fi

515 South Wickham Road, Melbourne, FL 32904, Approximate distance from right-of-way: 385 feet

This site is an automobile audio and electronics store. It is a fuel user that is non-retail. The FDEP STCM database lists that this site is closed, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 7

Laundry Delivered

7801 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 150 feet

This site facility is a closed dry cleaning facility. The FDEP STCM database lists that this site is closed, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 8

Champion Contracting of Central Florida

9065 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 425 feet

This site is a fuel user that is non-retail. The FDEP STCM database lists that this site is open, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 9

Tom Davis Construction Inc.

7850 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 180 feet

This site is a fuel user that is non-retail. The FDEP STCM database lists that this site is closed, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

May 9, 2011

Site 10

7-11 Food Store #32372

605 South Wickham Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 800 feet

This site is a retail gasoline station. The FDEP STCM database lists that this site is open, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 11

Florida Power & Light Brevard Service Center

9001 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 1000 feet

This site is a fuel user that is non-retail. The FDEP STCM database lists that this site is open, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 12

Moxley Construction

7619 Coral Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 720 feet

This site is a fuel user that is non-retail. The FDEP STCM database lists that this site is closed, has one (1) registered storage tank and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 13

DBA Systems Inc.

7301 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 100 feet

This site is an inactive hazardous waste facility. The FDEP RCRA/N database lists that this site is closed (CLO) as of 04/29/2008 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 14

Trans Plus Inc.

7615 Ellis Road Suite 106, West Melbourne, FL 32904, Approximate distance from right-of-way: 200 feet

This site is a closed automobile repair facility. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 09/11/1998 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 15

Finishmaster

7025 Industrial Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 520 feet

This site is a closed automotive and industrial paint facility. The FDEP RCRA database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 08/04/2000 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 16

United Recyclers Inc.

7350 Talona Drive, Unit E, West Melbourne, FL 32904, Approximate distance from right-of-way: 760 feet

This site is a non active recycling facility. The FDEP RCRA database lists that this site is a non-handler of hazardous waste (NHR) as of 11/28/1995 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 17

Colour Printing (Currently A Plus Auto Body & Collision)

7608 Coral Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 720 feet

This site has been an auto repair facility, a printing facility and presently an automobile body repair facility. The FDEP RCRA database lists that this site is a non-handler of hazardous waste (NHR) as of 06/04/1994 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

May 9, 2011

Site 18

All Pro Auto Center (Currently A Plus Auto Body & Collision)

7608 Coral Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 720 feet

This site has been an auto repair facility, a printing facility and presently an automobile body repair facility. The FDEP RCRA database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 04/20/1993 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 19

Kitchen Designs By Joan E Robbins (Currently Custom Kitchens & Cabinets Inc.)

7690 Industrial Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 400 feet

This site fabricates cabinets and builds custom kitchens. The FDEP RCRA database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 05/12/1999 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 20

J&S Corvettes (Currently Werkshop)

7630 Industrial Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 400 feet

This site is an automobile repair facility. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 02/10/1992 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 21

Buckman's Auto Care Inc.

7707 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 110 feet

This site is an automobile body repair facility. The FDEP RCRA database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 04/19/2010 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

May 9, 2011

Site 22

Sharpes Body Shop Inc.

7731 Industrial Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 590 feet

This site is an automobile body repair facility. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 05/05/1988 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 23

Amertron Inc.

7736 Industrial Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 400 feet

This site is a manufacturing facility. The FDEP RCRA database lists that this site is closed (CLO) as of 04/29/2008 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 24

Florida Sheet Metal Specialists

7791 Industrial Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 600 feet

This site is a sheet metal manufacturing facility. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 03/15/1989 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 25

Bellsouth Mlbrflmv 33053 (Currently AT&T)

7747 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 190 feet

This site is a telecommunications facility. The FDEP RCRA database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 02/17/1997 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

May 9, 2011

Site 26

Hills Inc.

7775 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 150 feet

This site is a manufacturing facility. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 12/20/2006. Four (4) violations were noted during a Legacy Site Inspection conducted on 12/20/2006. These violations include storage of hazardous waste for greater than 180 days, improper documentation of required inspections, failure to determine a hazardous waste and improper labeling of used oil containers.

Recommended corrective actions were taken by Hills Inc. to address the violations. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**. A photograph of the site is presented as **Photo 10** of the **Photographic Log** in **Appendix C**.

Site 27

Pilot Fibers Corp.

7789 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 230 feet

This site is an inactive hazardous waste facility. The FDEP RCRA database lists that this site is closed as of 01/11/2008 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 28

Targ It Tronics Inc.

7100 Technology Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 735 feet

This site is an inactive hazardous waste facility. The FDEP RCRA database lists that this site is closed as of 12/07/2000 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 29

Yowell Transportation Services (Currently American Door and Millwork)

7805 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 270 feet

This site is an inactive hazardous waste facility. The FDEP RCRA database lists that this site is closed as of 06/01/2010 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 30

World Class Inc.

7815 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 290 feet

This site is an inactive hazardous waste facility. The FDEP RCRA database lists that this site is closed as of 06/01/2010 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 31

Medicomp Inc.

7845 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 115 feet

This site provides medical equipment and services to the medical field. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 08/23/1988 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 32

Penske Truck Leasing Company (Currently Tom Davis Construction Inc.)

7850 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 160 feet

This site was a truck leasing facility and is currently used for building construction. The FDEP RCRA database lists that this site is closed as of 10/02/1990 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 33

Detroit Testing Laboratory Inc.

7852 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 190 feet

This site is an automotive testing laboratory. The FDEP RCRA database lists that this site is a small quantity generator (SQG) of hazardous waste as of 08/27/2009 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 34

Mack Technologies Inc.

7505 Technology Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 1200 feet

This site is a manufacturing facility. The FDEP RCRA/NPL database lists that this site is a small quantity generator (SQG) of hazardous waste as of 12/20/2000 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 35

Regency Communications Inc.

7505 Technology Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 1180 feet

This site is telecommunications contractor. The FDEP RCRA/NPL database lists that this site is closed as of 05/31/2007 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 36

Lockheed Martin Services Inv (Currently ISO Group Inc.)

7700 Technology Drive, Melbourne, FL 32904, Approximate distance from right-of-way: 520 feet

This site is a manufacturing facility. The FDEP RCRA/NPL database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 07/31/1996 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 37

Florida Power & Light Brevard Service Center

7901 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 360 feet

This site is a electrical utilities service center. The FDEP RCRA/NPL database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 01/09/1996 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

May 9, 2011

Site 38

Avasar Corp.

435 West Drive, Melbourne, FL 32904, Approximate distance from right-of-way: 420 feet

This site is a non active recycling facility. The FDEP RCRA database lists that this site is a non-handler of hazardous waste-Non notifier (NHR) as of 09/15/2010 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 39

iQ Valves Co. (Teknecraft, Inc.)

425 West Drive, Melbourne, FL 32904, Approximate distance from right-of-way: 460 feet

This site designs and manufactures custom valves, vacuum switches, etc. The FDEP RCRA database lists that this site is a conditionally exempt small quantity generator (CES) of hazardous waste as of 10/14/2010. During a Complaint Reconnaissance Inspection (CRI) conducted on 09/10/2001, FDEP detected that used machinery cooling oil was discharging onto the ground surface from 30 to 40 uncovered 55-gallon drums that were stored outside. Representative soil samples were collected and analyzed for possible contamination. According to records reviewed from the FDEP RCRA database, no soil contamination was reported.

During a Legacy Site Inspection conducted on 12/12/2001, FDEP issued seven (7) violations. These violations include diluting a restricted waste, improper waste handling and emergency procedures, failure to determine a hazardous waste, improper arrangements with local authorities and improper labeling of containers.

As of 09/12/2002, FDEP closed its enforcement case indicating that iQ Valves (Teknecraft Inc.) had satisfied the terms of its non-compliance. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low CRPR**.

Site 40

Plastics USA

360 Stan Drive, Melbourne, FL 32904, Approximate distance from right-of-way: 580 feet

The FDEP RCRA database lists this site as a closed, non-notifier as of 09/15/2010. FDEP conducted a Legacy Site Inspection on 11/16/1995. The inspection found that a discharge of coolant water mixed with hydraulic oil was occurring from the Plastics USA facility onto the adjacent property. Plastics USA was ordered to immediately discontinue discharging coolant water to the ground surfaces and contact the Industrial Waste section of FDEP for further advisement. At that time, FDEP requested a copy of receipts for used hydraulic oil generated at the facility and shipped off-site for recycling.

May 9, 2011

As a result of the Legacy Site Inspection conducted on 11/16/1995, FDEP issued two (2) violations including improper labeling and identification of hazardous wastes.

On a Closure Letter dated 05/16/1996, FDEP concluded that they had received all requested documentation and no further action is required by Plastics USA. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 41

Florida DMA National Guard Armory

475 South John Rodes Boulevard #3, Melbourne, FL 32904, Approximate distance from right-of-way: 210 feet

This site was a military armory. The FDEP RCRA database lists that this site is closed as of 08/21/2002 and has no known contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 42

PAPSCO Inc.

700 South John Rodes Boulevard, Melbourne, FL 32904, Approximate distance from right-of-way: 420 feet

This site was a printing/manufacturing facility. The FDEP RCRA database lists that this site is a non-handler of hazardous waste (NHR) as of 11/13/2007. During Legacy Site Inspections conducted on 07/31/2001 and 08/30/2001 and a Site Inspection on 08/27/2008, FDEP issued 16 violations for this facility. FDEP detected a spill of waste ink outside of a storage shed, storage of hazardous waste in open containers, storage of hazardous waste for greater than 180 days, failure to determine a hazardous waste, improper maintenance/operation of facility and improper documentation and labeling of containers.

PAPSCO Inc. made corrective actions. According to the FDEP RCRA database, there is a case resulting from an inspection on 08/27/2008 that has yet to be closed. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **Low** CRPR.

Site 43

Kanthal AB Group (Currently Custom Industrial Products Inc)

360 East Drive, Melbourne, FL 32904, Approximate distance from right-of-way: 520 feet

This site is currently a manufacturing facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

May 9, 2011

Site 44

American Printworks LLC

9135 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 370 feet

This site is a screen printing facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

Site 45

Gene's Auto Repair

7723 Ellis Road #4, West Melbourne, FL 32904, Approximate distance from right-of-way: 60 feet

This site is an automobile repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

Site 46

JW Austin Industries Inc.

7713 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 55 feet

This site is a plastic fabrication facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

Site 47

Hott Cars Auto Service & Sales

7709 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 125 feet

This site is an automobile repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

Site 48

Mark's Body Shop

7705 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 40 feet

This site is an automobile body repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR. A photograph of facility is presented as **Photo 11** of the **Photographic Log** in **Appendix C**.

May 9, 2011

Site 49

M&M Automotive

7615 Ellis Road #103, West Melbourne, FL 32904, Approximate distance from right-of-way: 140 feet

This site is an automobile repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

Site 50

Dependable Air Supply LLC

7621 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 80 feet

This site is a warehouse/distribution facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

Site 51

Oil & Lube Express

440 South Wickham Road, Melbourne, FL 32904, Approximate distance from right-of-way: 25 feet

This site is an automobile oil change facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR. A photograph of facility is presented as **Photo 12** of the **Photographic Log** in **Appendix C**.

Site 52

ML Autocenter & Body Work

7614 Ellis Road, Melbourne, FL 32904, Approximate distance from right-of-way: 65 feet

This site is an automobile/automobile body repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No** CRPR.

May 9, 2011

Site 53

Walker's Ellis Road Transmission & Auto Service

7622 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 90 feet

This site is an automobile repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No CRPR**. A photograph of facility is presented as **Photo 13** of the **Photographic Log** in **Appendix C**.

Site 54

Melbourne Motorsports LLC

9105 Unit A-4 Ellis Road, West Melbourne, FL 32904, Approximate distance from right-of-way: 60 feet

This site is an automobile repair facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No CRPR**. A photograph of facility is presented as **Photo 14** of the **Photographic Log** in **Appendix C**.

Site 55

Structural Composites Inc.

7705 Technology Drive, West Melbourne, FL 32904, Approximate distance from right-of-way: 170 feet

This site is a fiberglass fabrication facility. No Facility/EPA ID was found and there is no known record of contamination. Based upon the available information and its proximity to the roadway corridor, this facility was assigned a **No CRPR**.

7.0 RECOMMENDATIONS

This Contamination Screening Evaluation Report has identified 55 sites (1 **High**, 4 **Medium**, 38 **Low** and 12 **No**) within the study area that, in **NES's** opinion, have some risk of contamination impacts to this project. Contamination can have a significant impact on construction, particularly underground utility construction and dewatering since contaminated groundwater would require treatment, disposal and special permitting. Excessively contaminated soil would require special treatment, disposal and would not likely be used to backfill utility excavations or for surface grading.

The following provides a summary of the specific conclusions and recommendations developed for this project. These conclusions and recommendations are based on information collected as a result of the contamination screening activities presented herein.

May 9, 2011

For sites rated with a **High CRPR (Site 1)**, a Level 2 Environmental Site Assessment is recommended prior to construction. Some of the tasks would include site visits, interviews with the property owners, historical record research and collecting water/soil samples for laboratory testing. Laboratory analysis is necessary to determine the presence and/or levels of contaminants at and in the vicinity of the site.

For all sites having a **Medium or Low CRPR (Sites 2 through 43)**, NES further recommends that this CSER be updated for those sites if construction will occur more than one year from the date of this report. Another review of public record and other pertinent data should be performed to obtain the latest information concerning assessment or remediation activities at these sites. The public record review and the roadway design plans should be evaluated to determine if additional assessment is warranted due to significant changes in status since this report was prepared. Recommendations for future activities would be made based on the results of the additional data reviews.

For all sites having a **No CRPR (Sites 44 through 55)**, NES further recommends that these sites be revisited prior to the roadway construction to determine if higher quantities or new types, if any, of hazardous material have been introduced to them or if recent incidents, such as a change in type of business, may indicate a higher potential for encountering contamination.

NES recommends that surveys for asbestos and other potentially hazardous building materials be conducted prior to acquisition of any existing structures. Additionally, all hazardous building materials should be characterized and disposed of in accordance with existing applicable local, state and federal requirements.

Potential contaminated sites, within or near proposed roadway corridor, have been identified and evaluated. Prior to roadway construction, further site assessment is recommended to be performed to the degree necessary to determine levels of contamination and if necessary, evaluate options to remediate along with the associated costs. Resolution of problems associated with contamination will be coordinated with appropriate regulatory agencies and, prior to construction, appropriate action will be taken where applicable.

8.0 CLOSURE

It is our opinion that a complete environmental assessment of potentially contaminated facilities be conducted prior to final design.

Professional judgments expressed herein are based on the facts currently available within the limits of the existing data from FDEP, EPA and the scope of work. To the extent that more definite conclusions are desired than are warranted by the currently available facts, it is specifically NES's intent that the conclusions and recommendations made herein are intended as guidance.

Table 3: Historical Aerial Imagery Review Summary

YEAR	SECTION	TOWNSHIP	RANGE	SCALE	PHOTO LOG #	PHOTO QUALITY ¹	DESCRIPTION
1943	25-27, 34-36 & 30-31	27 South	36 & 37 East	Unknown	1	Poor	The photo shows no signs of development within the project vicinity. Aurora Road (County Road 511) is visible in the northern portion of the image.
1950	25-27, 34-36 & 30-31	27 South	36 & 37 East	1:60,000	2	Poor	Melbourne airport is visible just east of the project corridor. No roads or development are apparent in the project vicinity.
1958	25-27, 34-36 & 30-31	27 South	36 & 37 East	Unknown	3	Fair	Ellis and Wickham Rds. are visible in this photo. However, the roads do not appear to be paved. Emerald, Tropic, Coral, Lake Ibis and Silver Sands Drives (unpaved) are visible at the corner of Ellis and Wickham Rds. No other signs of development are apparent within the project corridor.
1969	25-27, 34-36 & 30-31	27 South	36 & 37 East	Unknown	4	Fair	South John Rodes Blvd. and I-95 appear in this photo. More development is apparent close to the corner of Ellis and Wickham Rds. and also towards the corner of Ellis Rd. and South John Rodes Blvd. South John Rodes Blvd. and Ellis Rd. do not appear to be paved.
1979	25-27, 34-36 & 30-31	27 South	36 & 37 East	Unknown	5	Fair	Roads adjacent to Ellis Rd. on the north side are visible. Development continues to grow in the Eastern (Ellis & Wickham Rds.) and the Western portions (S. John Rodes Blvd. & Ellis Rd.) of the project corridor, especially in the Southeastern portion. 19 residential parcels just west of Lake Ibis Dr. are visible. Ellis Road appears to be a paved in this photograph.
1994	25-27, 34-36 & 30-31	27 South	36 & 37 East	1"=840'	6	Good	Development is apparent in the majority of the project corridor. Residential parcels are observed on the north side of Ellis Road just west of Lake Ibis Drive. The majority of the south side of Ellis Road is commercially developed. Stormwater ponds are visible in the vicinity of the project corridor.
2010	25-27, 34-36 & 30-31	27 South	36 & 37 East	1"=995'	7	Good	Heavy commercial development is apparent throughout the project corridor. They are very few vacant lots remaining. Stormwater ponds and construction borrow pits are visible in the vicinity of the project corridor.

¹: Fair or poor photo quality indicates that the photographs were grainy, dark or washed out, or of such a scale that details were not apparent.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters,

treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.
Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA/MA DEP/CT DEP RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN - Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST - Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR - database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SNQ-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: BIA INDIAN LANDS AND NATIVE ENTITIES IN FLORIDA - database of American Indian reservations in Florida.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.
BUREAU OF INDIAN AFFAIRS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

State/Tribal Sites: FL DER/DEP/EPA FLORIDA SITES LIST - database of identified facilities and/or locations that the Florida Department of Environmental Regulation has recognized with potential or existing environmental contamination.

SUPERFUND HAZARDOUS WASTE SITES- database that correlates to the NPL list and includes active, delisted, and Federal sites.

State Spills 90: FDEP PETROLEUM CONTAMINATION AND CLEANUP REPORTS - database of contaminated facility reports provide the Facility ID, Facility Type, Score, Rank, Operator Information, and Owner Information, for facilities that currently have contamination

State/Tribal LUST: FDEP LEAKING UNDERGROUND STORAGE TANKS LIST - database of petroleum storage tank systems that have reported the possible release of contaminants. Included within this list are sites that are in the Florida Early Detection Incentive (EDI) Program, the Abandoned Tank Restoration Program (ATRP) and the Petroleum Liability Insurance Restoration Program (PLIRP). These programs support remedial action or reimbursement for those sites with environmental problems due to leaking fuel storage tanks. Some sites listed in the report have not yet been accepted in these programs.

State/Tribal UST/AST: FDEP/EPA STORAGE TANK AND CONTAMINATION MONITORING DATABASE - Database of all storage tank facilities registered with the Department and tracked for active storage tanks, storage tank history, or petroleum cleanup activity. Information includes facility identification number, site location information, and basic storage tank information such as size, placement, substance stored, installation date and current tank status.

TRIBAL LAND UNDERGROUND STORAGE TANKS - database of underground storage tanks that are reported to be on Native American lands. These sites are reported to the region 4 office of the EPA by the local tribal governments. The sites can be identified by their ID: NL-FL- number.

State/Tribal EC: FDEP INSTITUTIONAL CONTROLS REGISTRY DATABASE Subset- database of sites that have institutional controls and engineering controls was developed to assist with tracking those properties upon which an institutional control has been imposed pursuant to the provisions contained in Chapters 376 or 403, F.S. For Brownfield sites the ICR has been prepared for the public and local governments to monitor the status of those controls.

State/Tribal IC: FDEP INSTITUTIONAL CONTROLS REGISTRY DATABASE - database of institutional controls was developed to assist with tracking those properties upon which an institutional control has been imposed pursuant to the provisions contained in Chapters 376 or 403, F.S. For Brownfield sites the ICR has been prepared for the public and local governments to monitor the status of those controls.

State/Tribal VCP: FL DEP VOLUNTARY CLEANUP PROGRAM— A static state wide database of sites that have or may receive a tax credit. Tax credits are issued based on a percentage of the costs of "voluntary" cleanup. In other words, the person conducting cleanup is paying for it rather than the site being cleaned up using state funding through the Drycleaning Solvent Cleanup Program. The following three types of sites may be eligible for tax credits: (1) A drycleaning solvent contaminated site eligible for state-funded site rehabilitation under s. 376.3078(3), F.S.; (2) A drycleaning solvent contaminated site at which cleanup is undertaken by the real property owner pursuant to s. 376.3078(10), F.S., if the real property owner is not also, and has never been, the owner or operator of the drycleaning facility where the contamination exists; or (3) A brownfield site in a designated brownfield area under s. 376.80, F.S.

State/Tribal Brownfields: FDEP BROWNFIELDS REDEVELOPMENT PROGRAM DATABASE- database of reports generated from the Brownfield Access Database which tracks the number of designated Brownfield areas, executed Brownfield site rehabilitation agreements, state and federal programs funding, and local Brownfield coordinators' contact information

TRIS: EPA TOXIC RELEASE INVENTORY SYSTEM (TRIS)— Database that contains information on toxic chemical releases and other waste management activities reported annually by certain covered industry groups as well as federal facilities. This inventory was established under the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) and expanded by the Pollution Prevention Act of 1990.

RADON: NTIS NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

State Other: US DOJ NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

State Other: FDEP SINKHOLES - database of sinkholes from the Florida Geological Survey Sinkholes.
DRYCLEANERS LIST - database of dry cleaning facilities registered with the Department. Information

includes facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

CATTLE DIPPING VATS - database of vats that were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides such as DDT were also widely used. This is a static list from 1910 through 1950s.
