

EMERGENCY MANAGEMENT OFFICE SUMMARY

MISSION STATEMENT:

To provide public safety for the county's residents and visitors through an organized response to, and recovery from, natural and human-caused emergencies and disasters, systematically utilizing appropriate technology, planning, mitigation, and preparedness education; and providing efficient administration and management of the countywide public safety 800 MHz radio system and countywide E-911 system.

PROGRAMS AND SERVICES:

ACCOMPLISHMENTS, INITIATIVES, TRENDS AND ISSUES AND SERVICE LEVEL IMPACTS:

EMERGENCY MANAGEMENT OFFICE:

Accomplishments:

- Obtained state appropriation funding to continue site work and supporting infrastructure for the new Emergency Operations Center
- Successfully responded to Hurricane Dorian, managing the Emergency Operations Center and coordinating all county departments and partner agencies to ensure a unified response
- Activated the Brevard Emergency Support Team (BEST) Program, which was utilized during Hurricane Dorian and placed 349 county employees into the management, staffing, and operation of 14 county shelters; providing a safe refuge for over 1,700 residents and visitors, and over 50 of their pets
- Implemented an online bill paying system for health care facilities to more easily pay for their emergency plan reviews and increase the level of customer service available to them
- Procured a new generator for the Special Needs shelter at Oak Park Elementary and are working with the School Board and the State on the next steps for wiring and permanent installation
- Conducted health care plan workshops for nursing homes and assisted living facilities
- Participated in statewide collaboration via the Domestic Security Coordinating Group, Florida Emergency Preparedness Association, Radiological Emergency Preparedness Task Force, Web E O C Working Group, Legislative Working Group, Healthcare Committee, Higher Education Committee, Special Needs Working Group, Mass Notification Committee, Mass Care Working Group, and Training and Professional Development Committee

Initiatives:

- Refining the various emergency management technological platforms (Web E O C, Alert Brevard, BEST Application and Crisis Track) to increase capabilities and offer a better user experience
- Finalizing preparations for the potential consequences associated with the return to human spaceflight and the Mars radiological launch to ensure partners are ready to respond in the event of an anomaly

- Partnering with the State and Brevard Public schools to complete the final phase of the Oak Park Special Needs Shelter Retrofit that installs the necessary support systems for the new generator and provides stable back-up power to the entire facility
- Updating and submitting the County's Comprehensive Emergency Management Plan and Local Mitigation Plan as required by statute and achieve approval from the State
- Beginning the initial steps for re-accreditation from the Emergency Management Accreditation Program
- Building upon the lessons learned from recent hurricanes and other incidents to improve plans, policies, and procedures

Trends and Issues:

- Space launches continue to increase in frequency and with the return to human flight along with the Mars radiological launch slated for 2020, the strain on local resources and support systems will only intensify
- The COVID-19 pandemic necessitated a more-than-two-month EOC activation to coordinate response and recovery actions among the County, the Department of Health, the State, municipalities, non-profits, and other public safety partners, this activity is still ongoing and very impactful to emergency management staff since the burden is borne by just a handful of employees
- Volunteer and non-profit partners continue to experience a reduction in capabilities, primarily as a result of reduced funding or staff, which will necessitate other groups, primarily the County, to fill that void in regards to response and recovery
- Federal/State reimbursement from past hurricanes continues to be a slow, cumbersome process with constantly changing requirements, ultimately resulting in long delays before funds are received

Service Level Impacts:

Not Applicable

800 MHz

Accomplishments:

- Completed the installation of the P 25 radio recorder providing a centralized and redundant digital platform to all the P S A P's
- Completed the migration of the conventional interfaces to the P 25 core, expanding its functionality and reach
- Completed the consolidation of the South and North Integrated Multisite Console Controllers (I M C) into one centralized I M C, at the Rockledge site
- Completed the migration of the Region 5 VIDA switch to the Brevard County VIDA core
- Completed the video surveillance system for the radio frequency sites

Initiatives:

- Upgrade all the radio frequency simulcast sites to Project 25 (P25) Phase 2

Trends and Issues:

As technology evolves, and Brevard's population and urban surface boundary expanded, the enhancement of the radio system is critical. As funding becomes available, over the next six years, our focus will be to migrate the radio site frequency equipment to the new P25 core platform, completing the adoption of the P 25 standards.

Service Level Impacts:

Not Applicable

ENHANCED 911 ADMINISTRATION

Accomplishments:

- Completed migration of mapping network infrastructure
- Completed full data scrub, matching Master Street Address Guide automatic number identification with address point/street data, achieving a 99% match rate

Initiatives:

- Complete I3 platform upgrades for all Public Safety Answering Points to allow for a future move to geospatial call routing through NG911
- Complete a mapping network platform change at all 11 PSAP's
- Upgrade our current NG911 solution to a nationwide NG911 solution

Trends and Issues:

Telephone companies are notifying they are moving away from analog to I P based systems for all of their communication services, including 911. Specifically, A T & T announced they are doing away with copper by 2020. Next Generation 911 (NG 911) is a multifaceted concept, which includes I P-based 911 call routing systems, G I S and MIS systems to be implemented statewide with interconnectivity among systems across jurisdictional boundaries. An NG 911 call routing system is designed to handle, voice, data, text and video on a standardized IP-based platform. This requires a transition period from legacy 911 systems to NG 911 systems.

911 funding is through a surcharge of 40 cents that is on each telephone bill; however, only a percentage of the 40 cents is returned to the counties. Currently, 911 funding purchases/supports all 911 equipment for all the 11 P S A P's. Funding also supports training and other necessary equipment for the 911 call centers. General fund dollars do not support this program.

Address Assignment is supplemented by General Government revenues to cover those addressing functions which are unrelated to 911. The office has assumed responsibility for addressing for several municipalities and receives compensation from those municipalities.
