

- State of the art training and certification system
- Customizable simulations by incident type or geography
- Practice incident management situations before they are encountered
- Learn and improve skills for promotional exams
- Develop consistent strategies to produce consistent outcomes
- Gain years of experience in a matter of days
- Participants who successfully complete both the 50-hour online course and our 3-day Simulation Certification Lab receive nationally recognized certification as a “Blue Card Incident Commander.”

Brevard County Fire Rescue– Incident Command Training Center

“Professional Excellence, Community Pride.”

Training Today for Tomorrow's Emergency

Brevard County Fire Rescue is pleased to offer the most true-to-life incident command training program available in the Southeast. Utilizing the Blue Card Command curriculum, the Command Training Center prepares participants to effectively manage any emergency scene imaginable. One of only two recognized Blue Card Command Training Centers in Florida, the training is based entirely on retired Fire Chief Alan Brunacini's Fire Command and Command Safety Textbooks which have been used globally in the Fire Service for over 30 years.

Training Center Features

Classroom— All simulations begin here with a review of the program's content, objectives, critical incident factors, etc. Students are guided through a series of "sets and reps" which allow participants to relax and develop a flow before beginning actual simulations.

Control Center— Using Fire Studio 5 Software from Digital Combustion, instructors build and control all event simulations. Using a master control console, instructors can coordinate between all of the responding units in the scenario.

District Command Vehicle— Utilizing an actual fire vehicle cab, the command vehicle has all the normal functioning command equipment found in a front line response vehicle.

Company Level Officer Positions— Essentially computer work stations, each position represents a different response unit and see a unique perspective of the fire ground operation. With separate vantage points, effective communications between companies is critical to overall success of the scenario.

Mobile Command Unit— When an incident expands beyond a full first alarm assignment, the strategic IC can move to the MCU and form a complete command team. The Command Team consists of the IC, a Support Officer, and a Senior Advisor. The are additional work stations within the MCU to provide logistics, safety, and public information officers as the incident escalates.

The Command Team working together to bring about a safe and efficient resolution.

To learn more about this exciting facility and what it can do to improve incident command in your department, contact District Chief of Training William Burns at **321-633-2056** or via e-mail at william.burns@brevardcounty.us.
